

## **National Entrepreneurship Week website launched**

Columbus, Ohio, October 24, 2007 - The Consortium for Entrepreneurship Education today announced the launch of the official website for National Entrepreneurship Week at **[www.nationalEweek.com](http://www.nationalEweek.com)**

This website is designed to provide information to national, state, and local leaders involved in organizing Events to recognize this annual celebration. It provides ideas, resources, media information, marketing tools, stories from past events, plans for the future, and much more.

On February 23 - March 1, 2008, members of The Consortium for Entrepreneurship Education are sponsoring the second annual National Entrepreneurship Week, a Celebration of the heritage of entrepreneurship in America and new opportunities for a NEW GENERATION! They encourage entrepreneurs and educators everywhere to get involved in their schools and community.

The theme for October from National Entrepreneurship Week is NEW SKILLS....the essential ingredient for every community to replace the jobs that are going to other countries because of low labor costs. Congratulations to those who are encouraging our youth to think of NEW entrepreneurial ideas and opportunities as part of their education. For more information and to participate in National Entrepreneurship Week, check out the website at [www.NationalEweek.com](http://www.NationalEweek.com)
